S.M.A.R.T. KNOW. NET. Project Skills Matching And Route for Training – Knowledge Network

The S.M.A.R.T. KNOW. NET. application is aimed at facilitating the raising of professional abilities for the actual job offers and directing the development of such abilities in order to improve the perspectives of development to middle and long term.

Knowledge Network (KN) software, designed and realized by IRFI - *Istituto Romano per la Formazione Imprenditoriale*, and operational in Rome with the support of Trade Associations, detects the companies needs of professionals skills and identifies the evolutionary lines of needed by the training institutions in order to meet these requirements. SOUL (*Sistema Orientamento Università Lavoro*), related to KN software, takes out from its database the job or internship opportunities offered by the companies.

S.M.A.R.T. KNOW. NET. Project is realized through:

- Transfer and validation of KN software at EU level, collecting enterprises and skills data;
- Creation of a pan-European tool, localized for different countries, in order to help SMEs (Small and Medium Enterprises) and VET (Vocational Education and Training) to describe skills in a clear and portable way.

In fact, it is essential to improve the activities of monitoring and forecast pertinent to the job market and to the demands of professional skills, in order to:

- Facilitate the coupling of professional abilities with the actual job offers;
- promote the development of such abilities to improve the perspectives of long-term job;
- support the reintegration with specific competences for a new job.
